WHY?

Istanbul **GEDİK** University

Research University providing applied education

Continuous and comprehensive scholarships throughout the education period

Contemporary and experienced academic staff

Central campuses and easy transportation

The place where University -Industry cooperation takes place

Modern, scientific, technological laboratory infrastructure

Active use of Gedik Holding laboratories and practical training in factories

Technology Transfer Office

Internship and job opportunities

Professional experience in Radio Gedik

Opportunity to learn in the environment of artistic and cultural activities through Gedik Art

3+1 / 7+1 Model in Education

New Campus with 72000 m2 area

A photograph showing students working on a robotic car project. The car is a white chassis with two large black wheels and a smaller front wheel. It is equipped with various electronic components, including a microcontroller board, a motor, and a battery. A student is holding a small black component, possibly a sensor or a motor, and connecting it to the car. Another student is holding a small blue circuit board with various components. The background shows a laboratory setting with other equipment and a white wall.

International Research University Providing Applied Education

Istanbul Gedik University offers the best education in its fields with its experienced and well-equipped academic staff. It enables its students to put the acquired knowledge into practice without remaining in theory, to have experience in fully equipped laboratories and to create projects that gain achieved success throughout Turkey. It integrates science with technology and provides practical training.

Contemporary and Experienced Academic Staff

Our university trains the professionals of the future with its modern and experienced staff who closely follow the scientific developments in the world and present their professional knowledge and experience to future generations at world standards.

Modern, Scientific, Technological Laboratory Infrastructure

Our curriculum prioritizing academic education keeps students' sense of curiosity alive with its modern, scientific and technological laboratories as well as its research-focused infrastructure.

University - The Place Where Industry and Sector Collaboration Takes Place

Our university brings together its scientific knowledge and the scientists of the future whom it has trained with Gedik Holding's 59 years of experience in the industry, and transforms it into value in a way that contributes to the economy. It actively offers opportunities to its students in University - Industry and Sector projects during the education period.

What are 3+1 and 7+1 Education System?

The main purpose of the education model, called 3+1, is to ensure that 3 periods of education are taught at school and 1 period is full-time in enterprises in order to ensure that students are trained for employment in Vocational Schools that train qualified manpower for certain professions.

You are at work for a period

According to the 7+1 Education Model, students will take the theoretical and practical courses in the first, second and third grades in the school environment, and in the last semester of the fourth grade, in full-time businesses in accordance with the academic calendar.

With this model, our students will be ready for business life by having the knowledge and equipment needed by the business world, and they will be able to transition from education to the labor market more easily.

Istanbul Gedik University Technology Transfer Office

Istanbul Gedik University Technology Transfer Office (GÜNTTO) draws a road map for academicians, industrialists and start-up companies by operating in the areas such as university-industry collaborations, project management, property rights, start-up and incorporation processes and trainings for raising awareness.

Active Use of Gedik Holding Laboratories and Practical Training in Holding Factories

We support the academic education of our students in Gedik Holding laboratories and contribute to their professional experience while they are putting theoretical knowledge they gained in the field of engineering into practice. Our students also use laboratories actively and benefit from industrial education.

Opportunity of Being Expert in Welding Engineering and Non-Destructive Testing with 3rd Diploma

A 40% discount is applied for one year after graduation of our graduates' internationally recognized IIW, IWT and IWIP (International Welding Engineering, Inspectorship) trainings.

Engineering Faculty Metallurgical and Materials Engineering graduates and Vocational School Welding Technology, Underwater Welding and Non-Destructive Test graduates are again offered a 40% discount on the Non-destructive Testing Methods training fee (excluding exam and certificate fees), provided that it is valid for the courses to be opened within 1 year from the date of graduation

Opportunity of Study Abroad

Istanbul Gedik University, which hosts hundreds of foreign students, is an international university that sends students to many countries such as Poland, Macedonia, Greece, Portugal and Italy and welcomes students from these countries. Furthermore, it has agreements on partnership, cooperation and scientific exchange with universities in many countries such as Denmark, USA, China and England. Our students are actively offered the opportunity to study all over the world.

Research Oriented and Well-Equipped Library

Within the body of Istanbul Gedik University Library and Documentation Center, the first library was opened on Pendik Campus in 2010, then the second library in 2012 on Kartal Campus. In 2021, two more libraries were opened at the Faculty of Engineering on our Aydınlı Campus, and at the Faculty of Health Sciences on the Pendik Campus.

Our libraries have national and international collection that all students can access easily. In addition, in 2019 fall term, the library of the Law Faculty was also put into service.

Student Clubs, Social and Cultural Events

There are more than 35 student clubs that are actively operating at Istanbul Gedik University and these clubs organize many events throughout the year. Our student clubs take an active part in campus life by organizing social responsibility projects, trainings, seminars, trips and concerts raising awareness throughout the year.

Free Double Major and Minor Opportunity

Istanbul Gedik University offers the opportunity to receive a second diploma and certificate to the students who successfully continue their education in associate and undergraduate programs. Students who meet the necessary conditions can simultaneously continue their major and double major program free of charge and obtain a second associate degree and undergraduate diploma. In addition, undergraduate students can get a minor certificate by continuing a minor program in a field they are interested in.

Taking Active Duty in Original Research Centers

23 application and research centers within the body of Istanbul Gedik University continue their activities with their distinctive and pioneering works in their field. With their sociological, psychological, political, social and scientific studies, they reveal different references and views on many issues. Our students actively take part in our centers.

Internship and Job Opportunities

In order to gain the experience of studying while working or working while studying, our students have the chance to gain experience in business life in Gedik Holding organizations and other industrial companies by providing both internship and job opportunities. Our students have the opportunity to get to know their own talents by gaining leadership qualities and experience of working as a team through mentorship programs.

Career Opportunities

Istanbul Gedik University supports its students to prepare for professional life with industry-university cooperation and internship and part-time job opportunities for students.

Part Time Student

While continuing their education, students can get the opportunity to work in various administrative units of the university. The aim is to contribute to the development of our students as productive individuals who have acquired work discipline by employing them in temporary jobs in line with their interests and abilities in their spare time outside of class hours, enabling them to gain both financial gain and practical skills.

Internship and Part-Time Student

Thanks to the close cooperation of our university with the industry sector, our students have the opportunity to work part-time depending on the intensity of their internship and course programs.

A Successful Career Planning

Istanbul Gedik University Career Center offers a successful career planning with guidance, consultancy, professional and academic business life activities for its students and graduates with experts in their fields and industry leaders. It is among our primary goals to produce graduates who are well-equipped in their fields and have developed team and leadership skills.

Participation in Activities Bringing Individuals to the Society

Istanbul Gedik University Barrier-Free Life Center plays an important role in reintegrating individuals into society with its social responsibility projects. Social responsibility projects are carried out together with schools, municipalities and cultural centers. Our students, who take part in social responsibility projects, graduate as individuals with enhanced social awareness.

YAŞAM MERKEZİ**

Farklıyız ama eşitiz, birlikte daha güçlüyüz...

Qualified Art Activities

With concerts organized throughout the year as part of Gedik Art events, students explore different branches of art and continue their education in an environment where artistic and cultural activities come together. In addition, our students who take part in the polyphonic choir of our University, which continues their studies within the body of Gedik Sanat, also have the opportunity to discover their own talents.

Gedik Philharmonic Orchestra

Gedik Philharmonic Orchestra, which was established in May 2019 with the aim of being an exemplary orchestra that leads change, development and quality music, is on its way to becoming an inspiring world brand with its concerts.

Gedik SANAT
